

## MULTI-PURPOSE LITHIUM GREASE

500g Tin Part No: ZGB 00Q LIG 500

### 1. Product Description

A premium quality high melting point multi purpose lithium grease with EP additives for use in all roller type anti-friction and plain bearings subjected to high load conditions. Used extensively for applications throughout industry and the automotive sector.

### 2. Product Specification

- Operating temperature range: -20°C to + 140°C
- Melting point: 187°C
- Worked penetration: 265-295
- NLGI classification: 2
- Meets the approval of 267.0 Mercedes-Benz specification for service products

### 3. Product Benefits

- Excellent extreme pressure and anti-wear performance
- High degree of corrosion protection
- Highly versatile multipurpose grease

### 4. Product Usage

Multi purpose lithium Grease can be applied manually by using a standard grease gun (400gm cartridges available) or via central lubricating system designed for, and capable of, pumping NLGI No 2 grease.

### 5. Directions for Use

As with all greases used for the first time, check compatibility with the grease applied previously and if necessary purge bearings prior to application. Likewise, as a general rule, take care not to over-lubricate and apply the quantity of grease recommended by the bearing manufacturer.

### 6. Storage Instructions

Store sealed in a cool, dry place.

### 7. Shelf Life

5 years from date of manufacture.
